

HAVE A POSITIVE IMPACT IN BARCELONA

BY FOLLOWING THESE SIMPLE GUIDELINES BEFORE
ARRIVING AND DURING YOUR STAY

USE PUBLIC TRANSPORT

When moving around Barcelona or travelling outside the city, walk, cycle or use public transport. In Barcelona, we have a very reliable public transportation service. You and the planet will be thankful.

SUPPORT LOCAL BUSINESSES

When shopping, eating, touring or paying for any other activity while in Barcelona, always try to support the local economy by using only local businesses.

Restaurants that use proximity products, non-chain hotels and shops or companies based in the city are a good starting point.

KEEP IT LOW

When in your accommodation or small streets, try to reduce noise pollution. Remember that people live around you and loud noise can distract their daily routine.

REDUCE WASTE AND RECYCLE

Why stop recycling while on vacation?

In Barcelona, there are recycling containers every few meters.

GREEN for glass

YELLOW for plastic, bricks & metal containers

BLUE for paper & cardboard

BROWN for organic compost

GREY for general waste.

SAVE ENERGY

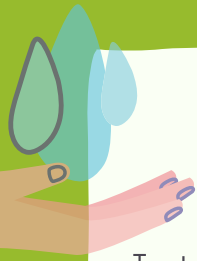

When in your accommodation, turn off the lights, don't use the air-conditioner and heating more than necessary and don't forget to turn off computers and unplug all charges.

DON'T WASTE WATER

Don't take too long while showering or washing.

Try to keep the same water bottle with you instead of buying a new one each time. Water in Barcelona is safe to drink and there are many fountains around.

AVOID PRINTING UNNECESSARILY

All sites and companies now accept online tickets on your mobile as proof of payment. Remember that unnecessary printing of tickets use paper and ink and this can be easily avoided.
